

Your Complete Network Start-Up Solution

AES-IntelliStart

Rapidly build, optimize, and expand AES-IntelliNet® networks.

AES-IntelliStart takes the guesswork out of building AES mesh radio networks. Customers are assigned a dedicated Project Manager and Field Technician who provides a project Kickoff Call, Onsite Installation, and Weekly Status Check-Ins assuring a reliable and fast private wireless network is in place.

BENEFITS:

- Successful deployment, maintenance, and expansion of your network
- Accelerated deployment with improved staff and resource efficiencies generating Recurring Monthly Revenue (RMR) quickly

Choose the AES-IntelliStart package that best suits your business

Central Station Starter Network Package

Designed for full-service central station installing alarm companies that want to expand their business, this package is comprised of AES advanced project management, on-site training and knowledge transfer, as well as factory certification of the AES-MultiNet system and oversight of the network programming and installation.

IP Link Starter Package

For alarm installing companies that use a contract central station for monitoring services and want to expand their existing business, this offering includes AES advanced project management, on-site training and knowledge transfer, as well as factory certification and oversight of the IP Links installation and programming. It also includes follow-up network health assessment and a Starter Network Kit.

About AES Corporation

AES Corporation is the leading manufacturer of code compliant wireless alarm communication products and solutions serving commercial security markets and government agencies worldwide. AES-IntelliNet® patented technology will never sunset compared to obsoleting technologies such as cellular and traditional phone lines. AES private mesh radio networks are owner operated and controlled, providing infinite scalability and superior reliability with the fastest transmission speed available. Over a half million AES Smart Subscribers are installed worldwide. AES is the clear choice for life safety and security, protecting people and property for over 40 years.
