

Job Description

Company Confidential

Posted: 1/15/2015

Department: Engineering

Location: Peabody, MA

Title: Software Quality Assurance Engineer

Reports to: Owais Hassan, Vice President of Engineering

Type of Position: Full-Time Part-Time Contractor Intern

Hours: 40/week Exempt Non-Exempt

DESCRIPTION

Due to accelerated growth, AES Corporation is actively seeking an expert Software Quality Assurance Engineer to work with our experienced team. With over 40 years of security innovation, AES is the leading manufacturer of products and solutions serving alarm monitoring companies and government agencies worldwide. Our mission is to deliver innovative wireless communication security solutions to our global customer base. AES offers a fast-paced, exciting, and rewarding work environment where our employees thrive with room for personal achievement. Put your knowledge and experience to work where it matters.

Corporate headquarters are located in Peabody, MA less than 20 miles North of Boston. This position reports to the Vice President of Engineering. The ideal candidate must have real world knowledge and a disciplined approach to product development. This individual needs to possess the ability to adapt to Time to Market (TTM) demands, ensuring product quality and timely delivery in a highly dynamic market environment.

REQUIREMENTS

- Previous experience developing production quality products and communication systems involving wireless, radio, security and mesh networking technologies.
- BSEE/BSCE/BSCS or equivalent working experience.
- Minimum 3-5 years Quality Assurance (QA) Life Cycle experience in the networking industry with successful track record of delivering projects on time (minimum 2 projects lead and delivered start-to-finish).

Job Description *(continued)*

Company Confidential

- Demonstrated experience in test planning, tests design, and test execution. Good knowledge of testing methodologies such as black-white box, integration, system testing and passion for quality. Tracking, assessing and reporting product quality per approved methods during development and post cycles, and coverage analysis.
- Experience in manual, automated and regression methods of testing.
- Ability to adapt to change well and quickly ramp up on new technologies, applications and testing standards.
- Demonstrated experience of managing multiple priorities and tasks in a dynamic work environment. Excellent written and verbal communication skills.
- The candidate must have a good understanding of release management and defect tracking processes and continually embrace and enhance existing QA functions, processes, procedures and hands-on proficiency with modern communication test equipment and radio based systems tools.
- Ability to work with small team on quickly moving projects that have tight deadlines.

AES is a well-established, wireless communications (RF) and security products company with an exciting environment serving a worldwide base of commercial and government customers. We offer a competitive base salary and benefits, paid vacation and holidays, 401K and more. Compensation is commensurate with experience.

Please send resume with cover letter (must include salary expectations) to:
