

## Interactive Security Services for AES-IntelliNet

AES's new interactive products combine *IntelliNet* mesh radio technology for delivery of alarm and other critical signals, plus Interactive Services delivered via high-speed Internet. The result is the highest reliability and speed of operation, plus the certainty that the communication technologies will never become obsolete.

### IntelliNet Mesh Radio Offers the Highest Reliability for Critical Event Signal Delivery

- Dealer owned and maintained radio network designed exclusively for critical event signaling
- No monthly telecommunication fees
- No worry of technology sunset as with cellular alarm transmission
- No worry of network outage because of bad weather or for maintenance as with cellular networks and Internet

Smartphone

Any Personal Computer with Internet access

### Dealer-Branded End-User Portal

Your customers access AES-SiteLink24's secure hosted services platform through a dedicated, dealer-branded web portal – including your logo and contact information via a link off of your website.

### AES SiteLink24 Dealer Portal – Account Activation and Management

Account set up includes an automated validation initiated by the host of the user's email and cell phone number for notifications.

### End-User Features

- Dealer-branded secure web portal
- AES Virtual Keypad enables full remote keypad operation through secure web portal and smartphone
- Check status of system and arm system – home, away, instant
- Bypass zones
- Silence alarms and/or disarm system
- Access keypad programming mode to make changes at any time from any place
- View event log and receive event notifications via SMS and/or email
- Manage multiple systems such as home and office from same App

### Dealer Features

- AES dealers manage end-user interactive service through secure AES-SiteLink24 web portal
- Dealer can make remote programming changes through Virtual Keypad
- Dealer and user can easily set up notifications via email and SMS
- Supports multiple alarm panel brands
  - ◊ Honeywell Vista
  - ◊ First Alert
  - ◊ DSC Power Series
  - ◊ GE NetworX NX Series
- Service enables remote upload/download to Vista panels using Compass

Wireless mesh networking is an innovative technology adopted by many industries with applications that need to communicate data over a large geographic area with a high level of reliability at a low total cost of ownership.

The advanced design and 2-way communications capability provides easy installation, expansion, and management when compared to alternative communication methods, both wired and wireless.

## AES-IntelliNet Interactive Products

For New Systems  
7058-IPD1

Add SiteLink 24 Interactive Services to Existing AES Subscribers –  
7659-IPD1-R Module

AES-IntelliNet's new interactive products combine *IntelliNet* mesh radio technology for delivery of alarm and other critical signals plus SiteLink24 Interactive Security Services delivered via high speed internet. The result is unmatched reliability and technological consistency since both AES-IntelliNet and the Internet are not subject to the forced technology sunsets and costly forced upgraded every x number of years like cellular-based services.

AES-IntelliNet dealers never need to worry about technology sunsets or cellular outages or uncontrollable third party service charges when it comes to job ONE – delivering fast and reliable alarm signals. Now, with SiteLink24 Interactive services, *IntelliNet* dealers can also offer fast and secure remote control with the mobility that users demand in today's world.

### Customer Management

### Dealer Account Management

AES-IntelliNet™ is the industry leader in delivering high quality wireless mesh networks to the fire and security industry in commercial, corporate, government, and educational applications with its broad line of products and advanced network management tools. Users of AES-IntelliNet networks have gained significant revenue, communications, and cost advantages while meeting the high standards of reliability required for the fire and security industry. AES-IntelliNet alarm monitoring systems are deployed at hundreds of thousands of locations in over 80 countries.

## How to Order

Model	Description
7058-IPD1	8 Zone Security Subscriber with Interactive-enabled full data module
7659-IPD1-R	Interactive-enabled full data module for use with AES-IntelliNet 7058E, 7450XL, 7050E

## Compatible Alarm Panels

**Ademco and Honeywell**  
(ECP MODE, Fully-Supervised)  
Vista 10P / 10PSIA / 128BP / 128BPE  
128FB / 128FBP / 128FBPE / 128SIA  
15 / 15CN / 15P / 15PCN / 15PSIA  
20P / 20PCN / 20PI / 20PS / 20PSIA  
21IP / 21IPSIA / 32FB  
**First Alert** FA130 / FA148 / FA168  
**ADT Safewatch Pro** 3000/3000EN  
**DSC Power Series** PC1616 / PC1832 / PC1864  
Alexor (mobile app not supported)  
**UTC (GE)** NetworX NX-4V2 / NX-6V2 / NX-8V2

ISS-2000	AES SiteLink24 Interactive Security Services with Notifications
