The 7794A AES-IntelliPro™ Fire is an add-on module for IntelliNet 2.0 subscribers that enables transmission of full alarm zone data from an alarm panel to a central station over an established AES mesh radio network.

AES subscribers with AES-IntelliPro™ Fire can operate in applications with or without a phone line providing full emulation of the phone line for the alarm panel communicator. AES-IntelliPro™ Fire supports most popular alarm communication protocols including Contact ID and Pulse.
Easy Installation

AES-IntelliPro Fire easily installs in the IntelliNet 2.0 subscriber housing and is powered from the transceiver module, requiring no additional power connections. 2.0 Fire subscribers can be ordered with AES-IntelliPro installed. AES-IntelliPro Fire is easy to program using a smartphone, tablet, or PC.

IntelliNet 2.0

Private Wireless Mesh Network

About AES Corporation

Established in 1974, AES Corporation empowers companies to grow profitable alarm monitoring businesses, and government agencies to enhance security anywhere in the world. By providing the industry's only patented operator-owned and controlled private wireless mesh networks, AES ensures superior reliability, low TCO and optimal RMR while reducing dependence on service provider infrastructures. The company’s flagship AES-IntelliNet systems are deployed in over a half million locations worldwide.
