Encapsulated Power Supply with Screw Terminals

As part of our ongoing commitment to making your installations easier than ever, AES has added an encapsulated power supply with screw terminals to our line of accessories. This new power supply ensures that you don't have to worry about available power from the alarm panel, eliminating unnecessary electrical work during your AES installations. The new power supply from AES:

- » Shares the AC input in the alarm panel to power an AES 2.0 Subscriber.
- » Eliminates the need for a dedicated power outlet for an AES 2.0 Subscriber.

Please note that this product only works with AES's 2.0 Subscribers.

Specifications	
Input Voltage	85~264Vac
Output Voltage	24.0 Volts
Output Current	2.500 Amps
Max Power	60 Watts
