

## 7275 Network Management System

### Overview

The 7275 AES-Network Management System (NMS) interfaces with the 7705ii MultiNet Receiver (MNR) to provide an end-to-end monitoring and management platform for your AES Network(s). The NMS tool gives users a complete network overview with key insights into performance via real-time dashboards, notification alerts, and map visualizations.

### Feature Highlights

- Real-time reporting of alarm panel and Subscriber events
- Interactive visualization of the network using Google Earth™
- Notification alerts via SMS and email
- Overall Network Health Score

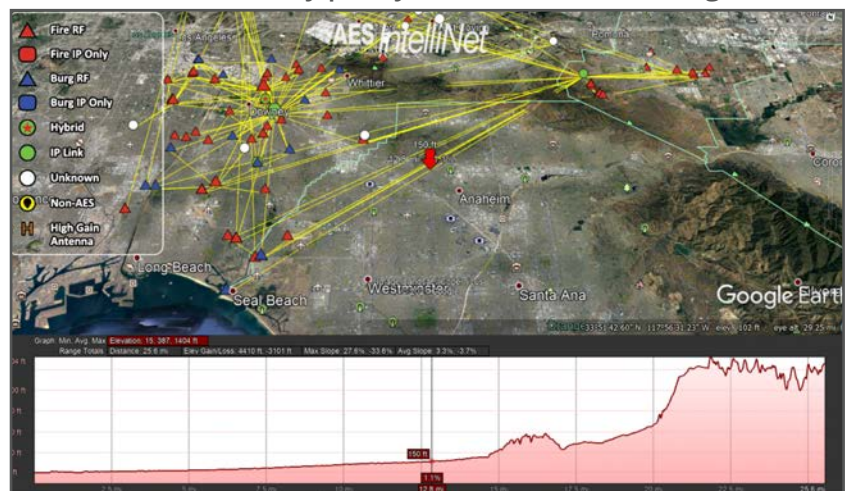

#### Access Real-time Network Health Score

### Key Benefits

- Proactive managing and monitoring of overall AES network
- Notify key personnel of critical network events
- See location and status of all IP Links and Subscribers
- Visibility into radio signal traffic makes it easy to quickly react to any network concerns or issues

#### Visually plan your network with Google Earth™
