7704-DMS Dedicated Monitoring System

FREQUENTLY ASKED QUESTIONS

Q: **Is this a standalone system or does it need to be hooked up to an existing AES Subscriber?**

A: The 7704-DMS Dedicated Monitoring System is a standalone system. It combines the functionality of an AES Subscriber (communicator) with a fire panel and is intended to monitor small fire system applications, such as a commercial sprinkler system.

Q: **What devices are compatible with this system?**

A: The 7704-DMS is compatible with the following manufacturers' devices: System Sensor®, Hochiki®, Potter®, and GENTEX®. Please refer to the manual for a complete list of devices.

Q: **How many devices can I hook up to this system?**

A: The total number of devices can range depending on how many Initiating Device Circuit (IDC) or Notification Appliance Circuit (NAC) you need to configure. Please refer to the *Battery Calculator* found at: **aes-corp.com/product/7704-dms-dedicated-monitoring-system**.

Q: **How much power can be used for NAC devices?**

A: The 7704-DMS offers 0.5 Amps of NAC power.

Q: **Does this system connect to Class A or Class B devices?**

A: This system is designed for Class B, 2-wire sensors.

Q: **How do you silence or reset this system?**

A: There is a silence/reset button located inside the enclosure.

Q: **Is the Dedicated Monitoring System certified for Canada?**

A: No. At this point in time the Dedicated Monitoring System has only been tested/approved for US markets.

Q: **Is this product UL listed?**

A: The 7704-DMS system has been tested by Intertek to the UL 864 Standard. **Follow this link** to learn more about Intertek (ETL) vs. UL Listings.

Q: **Is the 7704-DMS Dedicated Monitoring System CSFM and FDNY approved?**

A: Yes. The 7704-DMS Dedicated Monitoring System is both CSFM and FDNY approved.
